

CHAMAN PARK

Georgia's Mountain Garden

CHAMAN PARK

Georgia's Mountain Garden

Concept Note

CHAMAN PARK

Georgia's Mountain Garden

Project Overview

The purpose of this site is to excite potential visitors to come to the park by providing information about the park, display pictures of our many plantlife, wildlife species and activities; providing a description about each and explain the Folklore: Maya and the Ghosts of the Falls.

Target Audience

The target audience for the site is families, mountain bikers, fishermen, hikers, and nature lovers, of all ages and those who need to get away.

Design

Below is design compositions for the home and plantlife pages of the Chaman Park Georgia's Mountain Garden website. They are images that represent what the website will look like upon the completion phase. These are not final drafts but are good building blocks for the final design of the website.

The Chaman Park website site will use a clean and aesthetic approach that will be accomplished by using...

1. A decorative font that gives a clean and earthy look and feel to the site.
2. Custom shapes of mountains faded into the background of the logo.
3. A display of imagery throughout the entire website that will attract the users attention to the site.
