

"Holding Up The Light"

Concept Note

“Holding Up The Light”

Project Overview

The primary focus of the Sunshine Band is to reach out to our children, and offer an opportunity for them to receive salvation in their productive years. Through meaningful and wholesome activities such as music, bible study, drama, arts, and crafts, field trips, and special worship services, retreats and workshops; our children can be instructed in the way God wants them to go. We desire to build a partnership between the home, the school and the church in order to provide a spiritual foundation for each child.

The goal is to create a website providing information about the services, activities and workshops offered that will give the children the opportunity to learn, lead, follow, teach, explore, display their talents, develop and grow under the prayerful leadership of local volunteers, ministers, teachers and mentors. Activities that are planned for each age group according to their physical, social, emotional and spiritual maturity and workshops that are only available based up request.

Target Audience

The target audiences for the site are parents, ministers, teachers and mentors and children ages 10 and up who want to reach out to children, and offer an opportunity for them to receive salvation in their productive years.

Design

Below is design compositions for the home and contact us pages of The Sunshine Band website. They are images that represent what the website will look like upon the completion phase. These are not final drafts but are good building blocks for the final design of the website.

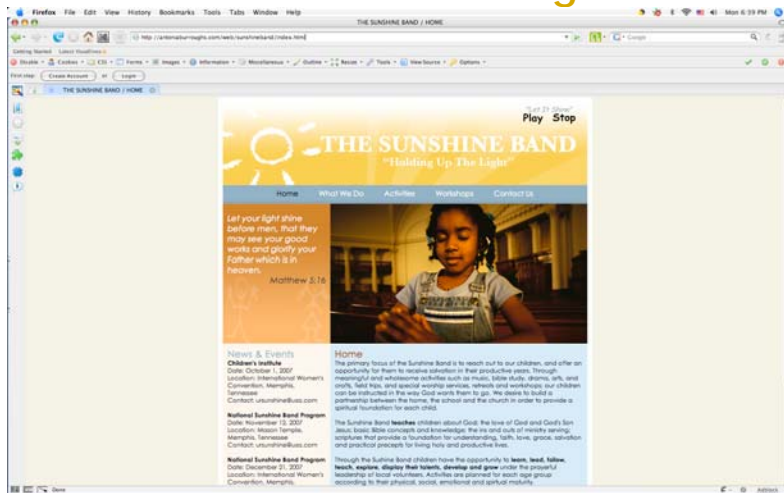

The Sunshine Band website site will use a clean and aesthetic approach that will be accomplished by using...

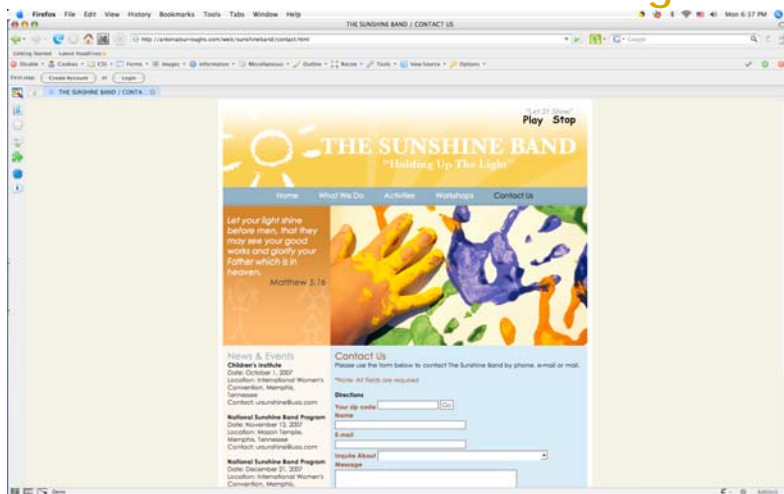

“Holding Up The Light”

1. Google maps directions form incorporated into the website.
